About the Park

Jerusalem Creek Marina & Holiday Park is located approximately 7km outside the township of Eildon. The park is situated at the deep water end of the lake and has historically always had access to the lake.

Originally developed from a green-field site in 1977, the park has steadily grown since and now boasts over 200 permanent camp sites, with more under development, and over 130 houseboat berths at its marina.

Lake Eildon is approximately 1 hour 30 minutes from Melbourne and can be accessed either through the Yarra Valley, from the snowfields of Mount Buller, or from the picturesque Strathbogie Ranges. The Marina and Holiday Park is situated on the banks of Lake Eildon, just off the main road that runs between Eildon township and Jerusalem Creek.

New ownership in 2009 has seen the park have a new lease on life. Works done both throughout the park and on the marina has been welcomed by the residents who frequent the park and marina.

Policy, Aim & Authority

Policy

It is our policy at Jerusalem Creek Marina & Holiday Park to minimize the risk of an emergency happening within the park and marina by keeping staff trained and residents aware of emergency procedures through constant communication and training.

Aim of this Plan

This plan has been created to provide information on the risks that could come about throughout the park and marina and what procedures to follow if an emergency does occur.

Authority

This plan has the approval of the park/marina owners. Permission is given to the Emergency Management Team and any other persons the EMT deems necessary to assist in the implementation of the procedures in this plan.

Authorised by: Bruce Vance

A handwritten signature in blue ink, appearing to read "Bruce Vance", is written over a large, light blue circular stamp or watermark.

Implementation date: 1st July 2014

First Aid	Rod Harland	0488 998 781
Risk Manager	Bruce Vance	5774 2585 0434 056 470

At times when the appointed person for the position is unavailable, it is the Chief Wardens responsibility to nominate persons for the position.

Duties & Responsibilities

Chief Warden (Bruce Vance)

The chief warden is expected to respond immediately to an emergency alarm, determine if an emergency should be declared in the park, determine what emergency procedures should be implemented, and bring the ECO promptly into action. The Chief Warden's duty will be to assume control of the customers within the park from the time an alarm is given through to the arrival of emergency services.

During an emergency the Chief Warden shall determine the nature of the emergency and decide on the appropriate action. If an emergency is declared, the Chief Warden shall initiate the emergency procedures which should include the following actions;

- Ensure that the appropriate emergency service has been notified,
- Ensure that the area wardens are advised of the situation
- If necessary initiate evacuation procedure
- Brief emergency service personnel on their arrival and thereafter act on the instructions of the emergency service's senior officer.

Deputy Chief Warden (Rod Harland)

The Deputy Chief Warden will take on the responsibilities of the Chief Warden if the Chief Warden is absent and otherwise unable to assist as required by the Chief Warden.

During an emergency the Deputy Chief Warden will be responsibility to:

- Attending the scene of the reported emergency
- Where applicable, acting in support of the Area Warden
- Evacuating persons away from any hazard
- Where safe to do so, taking steps to contain and or control the hazard
- Where applicable and practicable check to ensure that affected areas of the site have been evacuated
- Liaising with emergency services
- Keeping the Chief Warden informed of developments

Duties & Responsibilities

Communications Officer (Penny Paxman)

In the event of an emergency the responsibilities of the Communications Officer are to:

- Notify the appropriate emergency services
- Notify members of the Emergency Control Organisation as required
- Relaying information
- Maintaining a record of events of the emergency
- Notify Chief Warden of contact with Emergency Services

Assistant Warden (Toni Vance)

Assistant Wardens are responsible for:

- Overseeing the initial response to an emergency occurring within their area pending the arrival of the Deputy Chief Warden
- Ensuring that the Communications Officer is quickly notified of the situation.
- Ensure evacuation procedures proceed smoothly
- Checking to ensure area is completely evacuated
- Reporting to Deputy Chief Warden and Communications Officer of evacuation results

See Appendix 1 for Risk Management Matrix

Policies & Procedures

Bushfire

Being surrounded by acres of bushland, a bushfire is a high risk, if the weather is right. If a bushfire was to come this way again, like Black Saturday, there would be nothing we could do to stop it. Evacuation would be imminent.

To prevent bushfire fuel being left around the park, constant observation and removal of dead trees and debris occurs. Site holders are instructed to keep their sites clear of mess and clutter and woodpiles are kept to regulations.

We provide our customers with written communication on how to reduce the risks around their sites and prepare for the fire season. We have instructed all site and houseboat owners to have approved fire equipment located in the correct locations on their sites or within their houseboats.

Staff are trained in Fire Emergency Procedures and are aware of their responsibilities should an emergency occur.

Guests and Visitors are required to register at the kiosk so we have a list of who is in the park and marina at all times.

Emergency Procedure

1. Notify Chief Warden of bushfire threat
2. Activate park fire siren if imminent
3. Notify customers of bushfire threat and to get their Emergency Kits ready
4. Listen to radio for fire movements
5. Check park registry and gate entry for number of customers in the park and marina
6. Manually open boom gate for Emergency Vehicle Access
7. It is up to the Chief Warden to decide to evacuate

Policies & Procedures

Caravan/ Houseboat Fire

All of our site holders and houseboat owners have been given written communication about the fire equipment they are required to have onsite. We offer to have our accredited CFA representative check each site and houseboat to ensure all fire equipment is in date and in working order annually

Emergency Procedure

- 1. Call the Fire Brigade on 000.**
2. Evacuate guests to a safe location.
3. Make sure everyone is out of the van. If necessary, carry out evacuation procedures, if it is safe to do so.
4. Disconnect the power to the van, if it safe to do so.
5. Remove other vans and vehicles from the area, if it is safe to do so.
6. If the power to the van has been disconnected use the fire hose to extinguish the flame until the Fire Brigade arrives.
7. If the power to the van has not been disconnected or you are not certain, do not put water on the van. Rather spray surrounding areas to prevent the spread of fire.

Policies & Procedures

Gas Cylinder Fire

All of the parks' gas equipment is checked and maintained by Elgas. Residents gas bottles are checked regularly for leaks. We encourage park occupants to have all their gas appliances tested by an accredited gas technician. Our gas is supplied by Elgas, who checks and maintains our main gas unit.

Emergency Procedure

1. Call Fire Brigade on: **000** (give cylinder type and size).
2. Evacuate immediate area.
3. Apply water spray to cylinders and anything else the flame is contacting - **do not** extinguish fire if leak cannot be stopped.
4. Turn off cylinder valve if possible.
5. Notify Manager
6. Record details on appropriate paperwork.
7. Report to statutory authorities as required.
8. Arrange for recharging of fire extinguishers that were used

Authority **Elgas**

PH: **1800 819 783**

Policies & Procedures

Fuel Barge Fire

All staff are trained on how to refuel boats, jet skis and houseboats safely. There are fire extinguishers in the office of the fuel barge to be used in case of fire. **See Appendix 2 for Refuelling Procedure**

Emergency Procedure

1. Alert Kiosk of fire at Fuel Barge via UHF
2. Notify Chief Warden via UHF
3. Evacuate all persons from the fuel barge (if safe to do so)
4. Check the area, inform Chief Warden
5. Control Evacuation of any persons around
6. Maintain Control of persons at evacuation point.

Contact: CFA – 000
EPA – 1800 444 004
GM-W – 1800 064 184

Policies & Procedures

Personal Injury

Staff are trained to follow the correct operating procedures for all equipment used. If an injury does occur, emergency procedures are carried out. There is an accident incident report form to be filled out after any incident whether it be relatively minor or fatal.

Emergency Procedure

1. Notify First Aid Officer
2. Request assistance
3. Administer First Aid
4. Ring Ambulance 000 if necessary
5. Fill out Incident Report Sheet (Appendix 3)

Policies & Procedures

Power Failure

Due to the amount of power used throughout the kiosk, park, workshop and marina it isn't uncommon for a power failure. This will disrupt the running of the business by loss of lighting, refrigeration, boom gate access etc. This could also occur due to weather conditions.

Emergency Procedure

1. Locate torch (above UHF or in cleaning area)
2. Turn off non-essential circuits in main switchboard in kiosk hallway
3. Initiate starting of emergency generator then slowly turn on essential service circuits
4. Communicate with customers as to what is going on
5. Switch off sensitive appliances in the kitchen and office PC, Registers etc
6. Plug in emergency phone (next to telephone switch box in office)
7. Contact with power supply to alert of power failure
8. Evacuation of the building will be decided by Park Owner if required.

See page 42 for Evacuation Procedure

Policies & Procedures

Water Supply Failure

The lake is the park's main water source and also 150,000 litres of static water storage. If the water supply fails for any reason there is no back up and the park will lose supply for the kitchen and the toilet/ shower facilities. Water tanks have been installed and can be filled from an outside source if necessary.

Emergency Procedure

1. Notify Chief Warden of Water Supply Failure
2. Turn off any non-essential equipment that uses the water supply
3. Notify customers of water supply failure and advise them to turn off their main water supply

Policies & Procedures

Water Contamination

Again, the lake is the park's main water source. If it becomes contaminated, as it did with the blue green algae, most of our facilities need to find an alternative water source. Water tanks were installed to supply water to the kitchen and toilet block when we experienced the Blue Green Algae. We supply water at our kiosk at all times as we do not encourage any of our customers to drink the lake water. Potable is trucked in from Alexandria.

Emergency Procedure

1. Notify Chief Warden of contamination
2. Notify all customers in the park of the contamination
3. Place signs around the park warning everyone not to drink or use the water
4. Close Toilet Block 1 & 2 Showers & Wash Basins
5. Keep in communication with GMW as to risk level of contamination
6. Keep in communication with customers on risk level of contamination
7. Place signage up on notice board at front of kiosk.

Policies & Procedures

Disease

It is a rare occurrence for a disease outbreak in the park. To help prevent any disease from being spread throughout the park we offer soap dispensers in our toilet blocks and kiosk toilets. Our kitchen is equipped with sanitising dispensers as well as soap dispensers to help prevent any chance of food poisoning.

Emergency Procedure

1. Notify Chief Warden of Disease outbreak
2. Notify hospital of outbreak
3. Notify customers of outbreak and advise they be checked by a doctor
4. Ring Ambulance 000 if necessary
5. Isolate affected area, whether it be area of park or person

Policies & Procedures

Drowning

There is a lot of water, too much for us to guard at all times, so customers are advised to be water safe. Watch their kids, friends, pets etc. Signs are placed around the marina and kiosk to alert customers to the danger of drowning.

Emergency Procedure

1. Assign someone to call an Ambulance 000 and to wait and direct them to the casualty then to notify Chief Warden
2. Locate a life buoy and throw towards person if in reach and pull to safety
3. Administer First Aid as soon as safe to do so
4. If out of throwing reach, and trained to do so, attempt a swimming rescue
Do Not Attempt a Rescue Beyond Your Capabilities
5. For a swimming rescue, approach the person from behind. A panicking person may pull you down
6. Grab the person by a piece of their clothing or cup a hand or arm under the persons chin and pull the person face up to shore while providing special care to ensure a straight head-neck-back alignment especially if you think the person has spine injuries
7. The best option would be to float the person on a board while towing to shore if the equipment is available
8. If the person has stopped breathing then administer CPR immediately
9. Continue monitoring and administering CPR if necessary until ambulance arrives

Policies and Procedures

Water Sport Accident

1. Assign someone to call an Ambulance 000 and to wait and direct them to the casualty then to notify Chief Warden
2. Locate a life buoy and throw towards person if in reach and pull to safety
3. Administer First Aid as soon as safe to do so
4. If out of throwing reach, and trained to do so, attempt a swimming rescue
Do Not Attempt a Rescue Beyond Your Capabilities
5. The best option would be to float the person on a board while towing to shore if the equipment is available
6. If the person has stopped breathing then administer CPR immediately
7. Administer first aid as required.

Continue monitoring and administering CPR if necessary until ambulance arrives

Policies & Procedures

Falling Trees/ Limbs

The park has many large trees all with the potential to have limbs fall from them or even fall over in bad weather. To ensure the safety of our customers we have authorised persons come to inspect which trees need to be removed. Trees are removed by a registered arborist. A Tractor and Chain Saw are available for removal of a tree branch if such event does occur.

Emergency Procedure

1. Notify Chief Warden of location of fallen branch
2. Assess area for any casualties
3. If any casualties, contact kiosk to ring Ambulance 000
4. Stay with casualty until ambulance arrives but don't put yourself in danger
5. Contact kiosk to give update on casualty and to find out movements of ambulance.
6. Give kiosk location details of accident and advise them to direct the ambulance on arrival to the casualty

Policies and Procedures

Vehicle Accident

Emergency Procedure

1. Notify Chief Warden of location of accident
2. Assess area for any casualties
3. If any casualties, contact kiosk to ring Ambulance 000
4. Stay with casualty until ambulance arrives but don't put yourself in danger
5. Contact kiosk to give update on casualty and to find out movements of ambulance.
6. Give kiosk location details of accident and advise them to direct the ambulance on arrival to the casualty
7. Once casualties have been taken care of organise for removal of vehicles and debris blocking the road.

Policies & Procedures

Chemical Accident

Chemicals are used mainly for cleaning/ housekeeping purposes. In the event of a spill, the person who caused the spill is responsible for prompt and proper clean-up. It is also their responsibility to have spill control and personal protective equipment appropriate for the chemicals being handled readily available. MSDS cards are available in the cleaning area and other locations where certain chemicals are kept.

Emergency Procedure

1. Notify all persons in the affected area of spill.
2. Assign someone to locate signs to put around affected area
3. Notify Chief Warden of spill if further assistance is required
4. If there is a fire or medical attention is required ring 000
5. Attend to any persons contaminated. Contaminated clothing must be removed immediately and the skin flushed with cold water for no less than 15 minutes. Clothing must be laundered before reuse.
6. If a flammable material is spilled, immediately warn everyone, control sources of ignition and ventilate the area.
7. Wear personal protective equipment, as appropriate to the hazard. See MSDS sheets for appropriate equipment – located in the area where equipment is used regularly.
8. Clean up spill as per Material Safety Data Sheets.

Policies & Procedures

Electrocution

All of our sites in our park are unpowered. Power does run to our three toilet blocks located around the park. Trees are kept cut away from the power source to reduce the risk of accident occurring.

Power to our toilet block is located underground to avoid contact during maintenance or moving.

Emergency Procedure

1. Notify Chief Warden to ring ambulance 000
2. Shut off the power source if safe to do so
3. If the time to turn off the power source is too long you may need to try to dislodge the person from the circuit **Only if safe to do so. Do Not Attempt To Touch The Person With Your Hand, a Broom Stick is a good option**
4. If the person is conscious, have them lie still until the ambulance arrives, and monitor them to communicate to the ambulance officer
5. If the person is unconscious then CPR should be administered immediately until ambulance arrives

Policies & Procedures

Snake Bite

Jerusalem Creek Marina & Holiday Park is a great place for snakes to inhabit. As the weather warms up there are always increased sightings of snakes, be it dead or alive. Customers have been given information on snakes being in the area and how to treat to a bite. Any sighting reports are written on the white board out the front of the kiosk. Proper precautions are taken to remove the snake if kept in sight.

Emergency Procedure

1. Notify Chief Warden to ring ambulance 000 and Snake catcher if necessary
2. Assure the affected person that emergency services are on the way. Keep them calm and as still as possible. It is best to keep the venom affected area immobile and lower than the heart
3. Keep constant monitor on the vital signs such as breathing, temperature, blood pressure and pulse
4. Stay with the person until ambulance arrives.

Policies & Procedures

Dog Bite

A dog is part of the family so to be able to bring your dog on holiday with you appeals to some of our customers so we like to be able to give them the option to do so. In the event of a dog bite to another dog or person immediate action would be taken to rectify the problem so as not to affect our dog friendly environment.

Emergency Procedure

1. Have dog removed from premises
2. Notify Chief Warden of incident
3. Keep the customer calm and as still as possible
4. Rinse the bite wound and cover with a sterile dressing.
5. Encourage the person to seek medical opinion promptly

Policies and Procedures

Animal Attack

Emergency Procedure

1. Separate customer and animal
2. Notify Chief Warden of incident
3. Assess injury and call ambulance if necessary
4. Rinse the wound and cover with a sterile dressing.
5. Encourage the person to seek medical opinion promptly

Policies & Procedures

Bomb Threat

There have been no past bomb threats recorded to have occurred at the park. In the event of this happening, staff have been trained in the safe emergency procedures to deal with the situation.

Emergency Procedure

1. Stay Calm
2. Using the Bomb Threat Procedures Sheet (see Appendix 4), fill in as much detail as possible
3. Do not hang up the phone once the caller has hung up
4. Using a separate phone, possibly a mobile, ring the police 000 to notify them of the threat

Policies & Procedures

Flooding

We rely on Goulburn Murray Water to maintain and keep us informed as to any malfunctions with the gate which is the connection from the lake to the Goulburn River. A flood to our park would be very rare unless the bridge went beyond capacity and broke the gate. Weather reports are checked daily and customers are notified of bad weather coming.

Emergency Procedure

1. Ensure all staff and customers are aware of what's happening
2. Listen to the local radio for updates and advice
3. Block toilets and drains to prevent sewage back flow
4. Carefully stack valuables, furniture, and electrical items onto benches or tables or remove them off site
5. Carefully raise business equipment, stock and records onto benches or high shelves or relocate off site. Back up important records.
6. Tie Down objects likely to float and cause damage. Raise poisons, oils and chemicals well above floor level
7. It is up to the Park Owner if evacuation is to take place

See page 42 for Evacuation Procedure

Policies & Procedures

Sewage Failure

Regular checks are done on all sewage systems around the park by a registered plumber. If a sewage failure was to occur, staff and customers would be made aware of the incident and proper procedures taken to minimise contamination or illness.

Emergency Procedure

1. Notify Chief Warden of incident
2. Contact Greg Lund (plumber) on 0412549382 and inform of incident
3. Notify customers of sewage failure and need for alternative facility use until further notice
4. Place signage on toilet blocks and lock until problem is rectified
5. Keep customers updated about progress to eliminate constant queries
6. Remove signage and unlock toilet blocks when problem is rectified
7. Notify customers that problem has ceased.

Policies & Procedures

Houseboat/ Boat Sinking

The sinking of a houseboat or boat is out of our control, it is up to the responsible care and maintenance of the houseboat/boat by the owner. To assist anyone in trouble in the event of a sinking we would have use of our work barges, work crane and water transfer pumps if necessary.

Emergency Procedure

1. Call 000
2. Check if there are any passengers on board the vessel
3. Using the work barges approach the vessel
4. Help any passengers onto work barge and take to shore for medical assistance if necessary
5. Back at sinking vessel, ascertain possible cause of leak and attempt to stop leak
6. If required organize emergency pump
7. If own pump not successful, notify fire brigade
8. Check if bilges are oily, if so collect soaker pads from spill kit and insert in bilges
9. Dispose of contaminated spill in appropriate way
10. Tie float to vessel for salvage location
11. Move vessel to shallow water or slip vessel
12. File Incident Report

Policies & Procedures

Armed Robbery

If you see anything that makes you suspect somebody is going to attempt a hold up, lock the doors, call the police and stay out of sight until the police arrive.

However, if you are involved in an armed hold-up it is vital that to minimise the likelihood of anyone being injured that you practice and abide by the following procedures.

Remember money and stock is insured. Never refuse the demands of an armed robber, the outcome may result in injury or death to you, your guests or visitors. You have the responsibility to protect all victims. **Never put yourself or anyone else in danger by your actions.**

Emergency Procedure

1. **REMAIN CALM** – during an armed hold-up say to yourself “everything will be OK”. Remaining calm may reduce the likelihood of violence and hopefully minimise the robber’s stay.
2. **OBEY** - Do exactly what the robber says. Respond to the robber’s demands, don’t try to hide information or money, co-operate fully, remember people’s safety is more important than money or goods.
3. **OBSERVE THE ROBBER** - Identification of the robber may lead to his/her capture. Don’t make it obvious, just quick glances, no eye contact. Remember such things as: clothing scars, tattoos, height, weight and mannerisms and write them down as soon as he/she leaves.
4. **STAY OUT OF DANGER AREA** -The robber is in control and pumped with adrenalin. Do not try to outsmart him/her. Over eighty percent of victims are either injured or killed as a consequence of ignoring the potential danger or trying to act the hero.
5. **DO NOT CHASE THE ROBBER** - Identify his/her mode and direction of travel. Lock the premises, preserve all the evidence, ring the police and arrange all victims to help identify the robber. See Attachment for Offender Description Form
6. **NOTIFY MANAGER** – The manager will need to know of the robbery. How many people were involved and if everyone is ok. What paperwork has been filled out.

IMPORTANT

Contact a trauma counsellor. Any person (staff, customer or passer by), threatened by the offender should be offered help if required.

Policies & Procedures

Severe Storm

Throughout the year branches are trimmed away from caravan sites as much as possible. Debris is removed from the park surroundings on a regular basis to avoid flying debris in strong winds. All site owners are encouraged to have a portable radio, torch with fresh batteries and some spares for guests' use. They are also encouraged to keep their individual sites clear of debris and also to inform management of any tree limbs that may cause damage in a storm. After the storm the park will be inspected for any storm damage and appropriate action taken if necessary.

Emergency Procedure

- Listen to local radio for information.
- Shelter and secure pets and animals and ensure guests secure their pets.
- Shelter vehicles or cover with tarpaulin/blankets.
- Disconnect all electrical appliances (computers, registers etc) and check to ensure guests do the same.
- Tape (cross fashion 'x') or cover large windows and assist caravan park guests to do the same.
- Stay inside and shelter well clear of windows, in the strongest part of the building.
- If necessary, cover yourself with a mattress, blanket, doona or tarpaulin, under a table etc.
- Listen to your portable radio for storm updates.
- If outdoors find emergency shelter (not under a tree).
- If driving, stop clear of trees, power lines or streams.
- Avoid using the telephone during the storm.

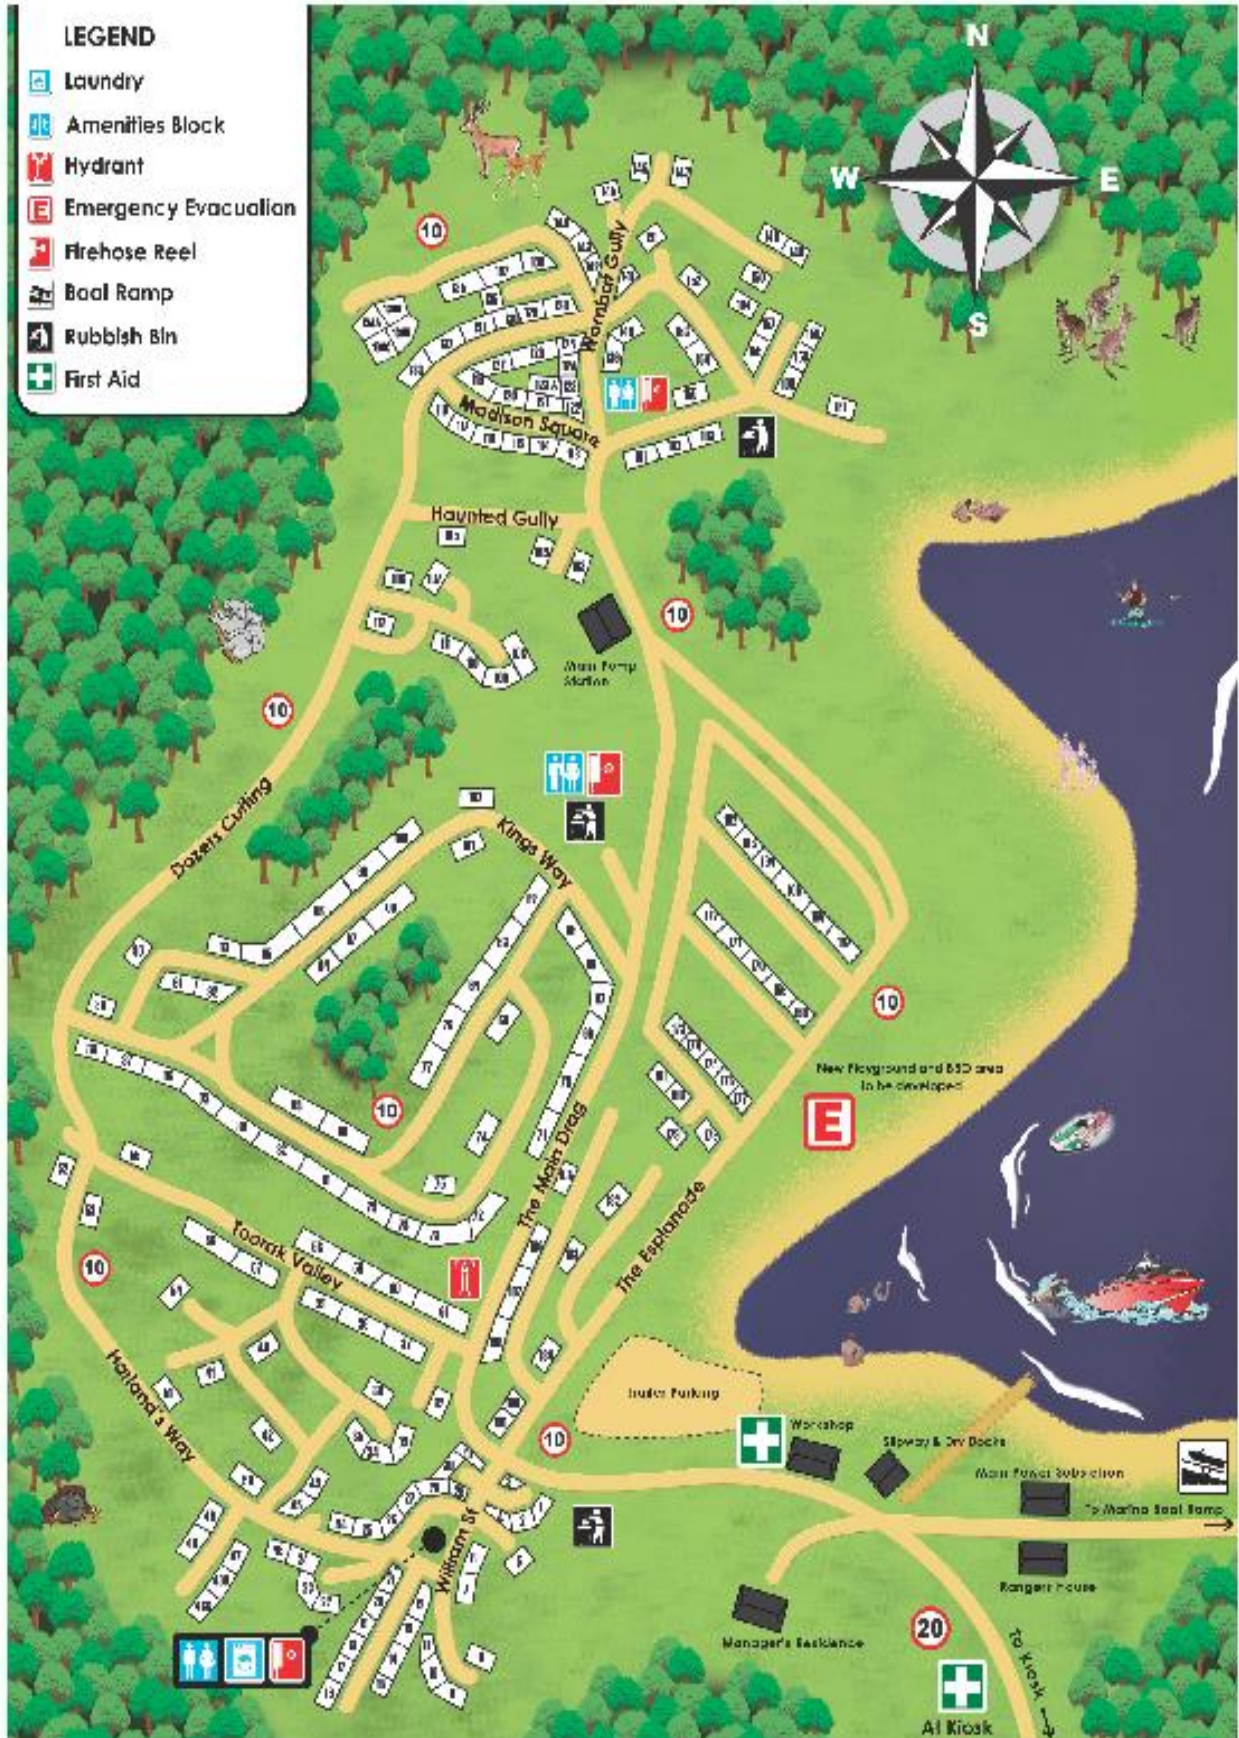

Hazardous Materials On Site

Chemicals are used mostly for cleaning/ housekeeping and in the workshop. MSDS sheets are available in all locations where chemicals are stored and a copy will be stored in this manual after revision.

We are currently in the process of minimising the amount of chemicals we use within our park. Previously there has been no organised record of chemicals kept and used.

Personal Protective clothing is provided for use when chemicals are being used. Correct storage of chemicals is ensured to minimise accident.

See Appendix 5 for Dangerous Goods Listings

Description of Park for Fire Fighting Purposes

Jerusalem Creek Marina & Holiday Park is located 7km on the Eastern Side of Lake Eildon. Comprising of 450 acres of bushland in total. 54 acres of this area has been dedicated to annual caravan sites.

These caravan sites are located within the bush. The normal bush setting of Jerusalem Creek Marina & Holiday Park is to be considered as a high risk bush fire area.

A fire break flanks the caravan sites.

Fire Fighting Trailer

1000ltr tank with 2 x 20mtr hose

Petrol Pump

To be towed by 4x4 work vehicles

For structural fire and black out

Stand Pipe

Located on road 'Main Drag'

For refilling purposes only

Hose Reels

Supplied by 150,000ltr static water supply located at all ablution blocks and kiosk for structural fire

Fire Extinguishers

Water/ Dry Chemical

Located around structures throughout park

For quick response fires

Water Pumps

2x Petrol fire fighting pumps

For drafting/ refilling from Lake Eildon

Fire Fighting Equipment List Cont.

Fire Truck

2 WD Austin Fire Truck
1500ltr tank with petrol power pump
20mtr of hose

Polaris 4WD Quad

4x4 quad motor bike
100ltr tank with electric pump
10mtr hose
For spot fires and blackout

Case Back Hoe

4x4 front end bucket/ Back hoe
For Firebreaks/ Blackout

Case Bob Cat

For firebreaks/ Blackout to create mineral earth trail/ firebreak

Mahrinda Tractor

4x4 front end bucket/ loader
For firebreaks/ blackout to create mineral earth trail/ firebreak

Work Barge x2

Equipped with petrol fire fighting pump
20mtr hose
For houseboat/ boat fire and foreshore fire

Evacuation Resources & Equipment List

In the event of an evacuation we have the following available to assist us in the emergency.

- Within our staff we have trained fire wardens and 2 CFA members.
- Portable radio for coordination of people in groups
- Evacuation audible alarm to signify all personnel must assemble at emergency assembly points
- Computer print out of people residing with park and marina for roll call
- UHF Channel 10 radios for communication between fire wardens

First Aid Wardens

Bruce Vance – Level 1

Toni Vance – Level 1

Rod Harland – Level 2

Errol Kellalea – Level 2

Penny Paxman – Level 2

Evacuation Procedure

Upon Evacuation Siren sounding or verbal instruction from fire warden:

- Collect your emergency Kit if safe to do so and proceed to your emergency assembly area.
- Stay calm and wait for further instruction from your fire warden

Holiday park Evacuation point – Located on middle foreshore area.

Signposted

Marina Evacuation point – Located at start of Marina Walkway. Signposted

General Store Evacuation point – Located at gate house / boom gates.

Signposted

Do Not

- Bring vehicles or vessels to Evacuation points. Only exception is for people with disabilities.
- Attempt to leave the Holiday Park or Marina unless advised to do so by fire Warden or police
- Attempt to leave the evacuation point unless advised to do so by fire warden or police
- Panic- remain calm and walk to your evacuation point
- Block access for emergency vehicle

Do

- Assist the elderly or young children
- Ask fire warden if you can assist
- Turn off gas bottles at your site prior to going to evacuation point
- Report missing persons

Emergency Kit

We strongly recommend that each person has an emergency kit ready and accessible. At a minimum the following items need to form part of your kit

Your Medication / First aid kit / 2 ltrs of water / Full change of clothes / life vest should we need to enter water / food / hat & sunscreen / respiratory face mask / torch

Implementation of Emergency Management Plan

All staff will be trained appropriately for an emergency using this plan. A simplified version will be given to all site and houseboat owners and encouraged to read it and keep it in a familiar spot for future reference.

Evacuation signage will be posted out the front of the kiosk and all three toilet blocks for site and houseboat owners and guests to view at any stage.

Keeping With The Plan

We will be giving our staff regular training through the CFA on various emergencies and holding 6 monthly Emergency Management meetings to review and update this plan as is necessary.

We will be constantly trying to upgrade and maintain firefighting equipment and also ensuring all site holders and houseboat owners have the minimum standard firefighting equipment as required under 'The Act' residential tenancies Moveable dwelling Act 2010 and check/ serviced annually.

Training & Records

Any training undertaken by any staff member will be noted in this emergency plan for easy determination of skills of various staff members.

Date	Name	Training Received	Conducted By
Dec	All Occupants	Receive a copy of Jerusalem Creek Marina & Park EMP	B Vance
Nov	All Staff	Trained in Jerusalem Creek Marina & Holiday Park EMP	B Vance
Nov	Fire Wardens	CFA Training on extinguishers refreshed Review warden accountabilities	Chief Warden
		First Aid Training	
		Asset management Accreditation	
Dec 13	All Staff	CFA training on extinguishers	Fire Wardens
July 14	All Occupants	New Emergency Management Plan	B.Vance/PPaxman

Appendix 1 - Risk Management Matrix

Likelihood	Consequence			
	Important	Serious	Major	Catastrophic
Almost Certain	Power failure			
Likely	Water supply failure Sewage failure Water Contamination	Fallen Tree		
Possible		Personal Injury/ Disease Snake/Dog Bite/ Sinking Boat or Houseboat/ Boat & Vehicle Accident	Caravan/Houseboat fire Fuel barge fire Gas cylinder fire	Bushfire
Unlikely		Armed Robbery Chemical accident	Electrocution	
Rare			Bomb threat Flooding	Drowning

Risk Category	Recommended Action
Extreme Risk	Must be managed with a detailed plan – will require resources and training
High Risk	Requires immediate planning – resource priority and training
Moderate Risk	Manage by specific monitoring or response procedures
Low Risk	Manage by routine procedures

Appendix 2

Refuelling Procedure

For the safety of both the customer and the staff member it is important to follow this procedure.

- Ask all passengers to vacate the houseboat/ boat and fuel barge while refuelling is in progress. One person may remain to assist with refuelling
- Ask the customer to turn off the houseboat/boat engine and turn off the gas bottles if it is a houseboat.
- All electronic devices must be switched off
- For boats equipped with engine motor blower fans switch on before refuelling for venting boat bilge of fumes
- For boats not equipped with engine motor blower fans, engine cowl/ cover is to be opened for natural venting
- Once the type of fuel required is determined, remove appropriate nozzle from bowser and begin refuelling.
Keep the nozzle pointing upwards, but not towards your face, between bowser and vessel to avoid leakage.
- Once the tank is full to the customer's request, remove the nozzle from the vessel and replace back on the bowser properly
- Note down the type, litres and amount and proceed to the fuel barge kiosk to process payment
- Boat to be restarted before passengers return to boat
- Inform the rest of the passengers that they may now return to the vessel

Appendix 3

Jerusalem Creek Marina & Holiday Park Accident Investigation and Analysis

What sequence of unintended events contributed to this accident? See Identification Guide
1.
2.
3.
4.
What sequence of unforeseen hazards contributed to this accident? See Identification Guide
1.
2.
3.
4.

Identification Guide

- Did any defect in the equipment/tool contribute to hazardous conditions?
- Did the general design or quality of the equipment/tool contribute to a hazardous condition?
- Did the location/position of the equipment/employees contribute to a hazardous condition?
- Was the correct equipment/tool used for the task?
- Was appropriate protective clothing/equipment specified for the job?
- Was the employee wearing the specified protective clothing/equipment?
- Was there an acceptable standard of housekeeping in the area?
- Was the employee affected by drugs/alcohol?
- Was there sufficient work space for the task?
- Was there adequate means of access available?
- Were there written/known procedures for this job?
- Were verbal/written instructions for the job adequate and understood by the employee?
- Did the employee deviate from the known job procedure?
- Was the employee adequately trained to carry out the task?
- Was the employee affected by fatigue?
- Was lighting/ventilation appropriate?

Action needed to prevent accident recurrence

Improve housekeeping		Correction of congestion		Re-instruction of person/s involved	
Job safety analysis		Improve workplace conditions		Discipline of person/s involved	
Equipment repair or replacement		Improved personal protection		Re-instruction of others	
Improve equipment design		Regular pre-job instruction		Temporary relocation of person/s	
Improve equipment construction		Use of safer materials		Permanent relocation of person/s	
Installation of guard or similar		Check with manufacturer		Other

Appendix 4

JERUSALEM CREEK MARINA & HOLIDAY PARK BOMB THREAT PROCEDURES SHEET

Listen carefully, stay calm and don't panic, that is exactly what the caller will want you to do. Ask the caller the following questions, take notes and complete the tick boxes regarding the callers voice, background sounds and threatening language. All this will help the police make judgement on the seriousness of the call and assist them to catch the caller. When the caller hangs up, place the handpiece beside the telephone to keep the line open.

Wording of the threat (try to recall exact words)

Keep the caller talking. Try to get as much information as possible by asking questions and listening for other details. Record details as listed below

1. When is the bomb going to explode?

2. Where is it right now?

3. What does it look like?

4. What kind of bomb is it?

5. What will cause it to explode?

6. Who placed the bomb?

7. Why?

8. Where are you?

9. What is your name?

Estimated age of caller: _____ Sex of caller: _____

Does caller seem intoxicated? _____

Time: _____ Date: _____

Caller Details:
